WORK EXPERIENCE

Medrop— *Frontend Developer*

JULY 2021 - SEPTEMBER 2021

I worked on a team to create an hardware Heart-rate monitoring device(HRM)

- Created a beautiful web and mobile design.
- Implemented figma designs into responsive webpages.
- Pulled data from the hardware device in real time to display live health readings.
- Visualised the raw analog data using charting libraries (JS).

Draftansy— *Frontend Developer*

NOVEMBER 2020 - FEBRUARY 2021

I worked with the Draftansy engineering team as a frontend developer for 4 months.

- Transformed figma designs and specific components into functional UI with HTML, CSS and Javascript.
- Worked with a senior developer to implement components with React & Redux for state management.
- Analyzed UI/UX designs for responsive layout for improved usability
- Got familiar with Notion for task management

HNG Internship— *Frontend Developer [Intern]*

MAY 2020 - JULY 2020

I participated in the HNG 2020 internships and worked as a frontend developer.

Idea Konsult— *IT intern [Intern]*

JULY 2019 - DECEMBER 2019

I interned at Idea Konsult for 6 months as an IT intern as part of the requirement for my university degree.

- Installing operating systems, software applications, antivirus etc for staff of company
- Worked closely with my hardware supervisor in building custom computer systems.

EDUCATION

Federal university of technology, Akure.

Computer Engineering (B.eng)

2015 - 2021
